FASETT2 will carry out a concept study for a new military transport aircraft concept, targeting 20 tons payload (future midsize tactical cargo, FMTC).

The aim of the project is the maturation of technologies identified as the result of the predecessor project (FASETT). It targets to become the European answer to the ageing fleet of mid-size transport and mission aircraft, by providing a cost competitive and robust platform based on state-of-the-art technology. Additionally, the platform will become a multi-role vector with a wide range of additional capabilities beyond cargo transportation, such as medical evacuation or search-and-rescue missions.
